

The right seat size is important for you to be comfortably secure on your balance point. Some riders prefer to be snug in their saddle, some riders like to have a little more room to move around in the seat. If your seat is too small for you, you may cause your Horse discomfort and pain.

In case you are uncertain, check in with us and take a test ride:

### WE ENCOURAGE YOU TO MAKE SURE YOU LIKE THE FIT & FEEL!

Choose your saddle's size based on your height, weight and leg length in combination with any preferences you might have for snugness or a more \*open\* seat. Sizing is not an exact "science" based on micro-dimensions. If you are in between sizes as identified below and/or you carry your weight proportionately more in your lower half, we generally recommend going to the next size up so you don't feel restricted in any way.

### IF YOUR SADDLE HAS BUCK ROLLS

14.5" - 15" would be an extremely small seat size (suitable for a very small adult)

BUCK ROLLS shorten the seat by approximately 1" and hold you tighter. The balance point of each of our seats is so nicely defined, BUCK ROLLS are not necessary for a secure feeling. For other saddle models without BUCK ROLLS, 14.5"-15-5" would be suitable for small adults.

### ! 16", 16.5" and 17" ARE THE MOST COMMON SEAT SIZES CHOSEN

Saddle seat sizes are often confusing and inconsistent because measurements points differ between styles and traditional methodologies: Saddles are sometimes measured from back of fork to top of cantle instead of back of fork to rear of seat. Also, if your saddle style's fork leans forward, backward or is built straight up, this can make an important difference in the "measurement number".

## SEAT SIZE GUIDE

APPROXIMATE SUGGESTIONS

13.5" - 14" seats are possible only for the BARREL RACER, the RANCH VERSATILITY and the ROPER.	<b>13.5"</b>
	<b>14"</b>
14.5" is a VERY small seat in our saddles, suggested only for VERY small adults.	<b>14.5"</b>
	<b>15"</b>
4`9 to 5`2 // 144 to 157 cm 95 to 120 lb // 43 to 54 kg	<b>15.5"</b>
	<b>16"</b>
5`3 to 5`6 // 160 to 168 cm 120 to 140 lb // 54 to 64 kg	<b>16.5"</b>
5`4 to 5`10 // 163 to 178 cm 135 to 165 lb // 61 to 75 kg	<b>17"</b>
5`5 to 6`10 // 165 to 188 cm 175 to 200 lb // 79 to 91 kg	<b>17.5"</b>
5`6 to 6`6 // 168 to 198 cm 185 to 220 lb // 84 to 100 kg	<b>18"</b>
In general, our sizes range from 15"-17.5". If you desire a slightly larger seat size than 17.5", please contact us at <a href="mailto:saddles@naturalhorsemansaddles.com">saddles@naturalhorsemansaddles.com</a>	

## CHOOSE YOUR FENDERS

**YOU NEED TO KNOW YOUR LEG LENGTH FROM CROTCH TO FLOOR IN STOCKING FEET**

You choose your fender length so your stirrups can be the right length for you without too much or too little of the fender adjustment straps left over. Sometimes you might want your stirrups to hang longer for long trail rides and shorter for challenging rides

**PLEASE DO NOT USE YOUR JEANS SIZE FOR CALCULATION**

FENDER LENGTH	INSEAM LENGTH
XSMALL	LESS THAN 27" (68 CM)
SMALL	27" (68 CM) TO 30" (76.5 CM)
MEDIUM	30" (76.5 CM) TO 33" (84 CM)
LARGE	33" (84 CM) TO 36" (91 CM)
XLARGE	LONGER THAN 36" (91 CM)
